

42. The network control system according to claim 2, wherein
said operation information includes an operating position information indicative of
an operating position on said operating screen.

43. The network control system according to claim 9, wherein
said partial screen identification information includes version information indicating
a version of said partial screen display data.

44. The network control system according to claim 9, wherein
one display element in screen display is arranged in any one of a plurality of display
parts corresponding to said plurality of partial screen display data.

45. The network control system according to claim 9, wherein
a display element corresponding to each operation by the user is arranged in any
one of a plurality of display parts corresponding to said plurality of partial screen display data.

REMARKS

The above claim amendments are presented in order to remove multiple claim dependency,
so as to reduce the required filing fee.

Respectfully submitted,

Yoshifumi YANAGAWA et al.
